S.No	Themes	Problem Statement	Goals
1	Smart Education	Smart Assessment Board: School teacher is planning to conduct a quiz competition on identifying states and its capitals of our country. Hence, school teacher needs a model through which teacher conducts the competition easily.	Quality Education
2	Agriculture	Crop and soil management System: Farmers face several challenges related to crop selection, soil management, disease identification and other factors, which can impact agricultural productivity and sustainability. To address these challenges, we need an application to help farmers for full-fledged farming.	Zero Hunger
3	Clean and Renewable Energy	Solar Efficient System: In recent days, energy generation using solar panels are in high demand, due to lack of proper maintenance of the solar system energy generation is degrading to the levels. Hence, an automatic system software to be developed for saving the solar energy.	Industry, Innovation and Infrastructure
